The hot topics currently discussed in the German DAV include:

- unisex ruling by the European Court which prohibits the use of gender as discrimination criteria in individual life tariffs. Unisex tariffs had been legal requirement already for certain retirement savings products with fiscal benefits before the EU ruling. The gender mix of a portfolio becomes an additional tariff variable.

- Longevity trend assumption in annuity table DAV2004R: reviewed on an regular basis and updated as required.

- Disability calculation bases by professional segments
