April 11, 2014

James Gunn  
Technical Director  
International Auditing and Assurance Standards Board  
529 Fifth Avenue, 6th Floor  
New York, NY 10017 USA  

Dear Sir,

These comments have been prepared by the Insurance Accounting Committee of the IAA. If, upon reading these comments, you identify any points that you wish to discuss or obtain further insight, please do not hesitate to contact William Hines, vice-chairperson of the committee (and also the IAA representative to the IAASB CAG), care of the IAA secretariat (at secretariat@actuaries.org). We hope that our comments provide assistance to the IAASB Board and staff on this project. The IAA will be pleased to develop the ideas presented in these comments further with you.

Yours sincerely,

Robert L. Brown  
President

Attachment: IAA comments

International Actuarial Association and its Due Process

The International Actuarial Association (the “IAA”) represents the international actuarial profession. Our sixty-five Full Member actuarial associations, listed in Appendix A to this statement, represent more than 95% of all actuaries practicing around the world. The IAA promotes high standards of actuarial professionalism across the globe and serves as the voice of the actuarial profession when dealing with other international bodies on matters falling within or likely to have an impact on the areas of expertise of actuaries.

We are pleased to be given the opportunity to provide input to the IAASB on this Consultation Paper both through William Hines, the IAA’s representative to the IAASB’s Consultative Advisory Group and here in writing. These comments have been prepared by its Insurance Accounting Committee, the members of which are listed in Appendix B to these comments. It has also been subject to the due process required for it to constitute a formal view of the IAA and will be posted to the IAA’s official web site.

IAA Comments

We thank the Board for continuing to seek input from its stakeholders regarding its strategy and the projects/activities that it expects to allocate its resources toward. We believe that this transparency adds significant value to its governance process and ultimately to the value of its output. From our perspective as actuaries, we have certain observations and suggestions regarding the plan, especially as it relates to the auditing of insurance entities and similar financial security programs.

Financial and regulatory financial reporting standards for the insurance industry and its contracts have evolved significantly over the past twenty years and will continue to change in a significant manner in the near future.

The revisions to IFRS 4 expected to be adopted by the International Accounting Standards Board in the near future will move the insurance industry toward more consistent financial reporting on a global basis. At the same time, the International Association of Insurance Supervisors (IAIS) is developing standards for regulatory reporting. These changes will require an increase in the use of professional judgment to estimate reported values, particularly those of insurance contract liabilities. To implement these standards, the actuarial profession will continue to play a critical role in this measurement and review of calculated values for insurance contract liabilities and other items.

We believe that, in view of the above and the insurance industry’s unique long-term obligations involving (to use fair value terminology) level 3 inputs, significant benefits will be derived to all related stakeholders to add a project relating to the audit of insurance entities, which recognizes the relationships among the preparer, regulators, auditors and actuaries.

In parallel with discussions relating to the audit of banks and the relationship between banks, supervisors and external auditors, further discussions regarding appropriate treatment involving insurers should also be held. We are eager to provide resources to a working party to develop appropriate guidance in this area.
